

PassportSahayak AI — API Endpoint Reference

Complete list of REST endpoints across all 8 backend microservices, accessed via the API Gateway.

Gateway base URL (dev): **http://localhost:9080/api** | All paths below are relative to that base | Auth: Bearer JWT in Authorization header (issued by /auth/login) unless marked Public

1. auth-service — Identity & Authentication (port 9081)

Owens: users, roles (APPLICANT / PSK_OFFICIAL / RPO_OFFICIAL / ADMIN), JWT issuance

METHOD	ENDPOINT	AUTH	DESCRIPTION
POST	/auth/register	Public	Register a new user account with a chosen role (applicant, PSK/RPO official, or admin)
POST	/auth/login	Public	Log in with email + password, returns a JWT bearer token
GET	/auth/me	Any authenticated user	Get the currently logged-in user's profile

2. application-service — Passport Applications (port 9082)

Owens: eligibility rules, document checklist, fee schedule, ARN generation, canonical application status

METHOD	ENDPOINT	AUTH	DESCRIPTION
POST	/applications/eligibility/check	Public	Rule-based eligibility check (Fresh/Renewal/Tatkal/Lost, validity, PV type hint) — KB-PASS-001 rules
GET	/applications/document-checklist	Public	Required documents & annexures for a given application type — KB-PASS-002 rules
GET	/applications/fee-estimate	Public	Fee calculation for a given type/scheme/booklet/minor combination
POST	/applications	Applicant	Create a new passport application — generates the ARN and calculates the fee
GET	/applications/mine	Applicant	List the current applicant's own applications
GET	/applications/{arn}	Owner or Official	Get full application detail by ARN
GET	/applications/{arn}/status	Owner or Official	Track application status + plain-language "what happens next" (SRS FR-015)
GET	/applications?status=	Official / Admin	List/queue applications filtered by status, paginated
PATCH	/applications/{arn}/status	Official / Admin	Manually update an application's status/PV type/remarks
PATCH	/internal/applications/{arn}/status	Internal service key	Service-to-service status push (called by appointment-service & police-verification-service)

3. appointment-service — Centers & Appointments (port 9083)

Owens: PSK/POPSK centers, slot capacity, appointment booking/reschedule/cancel lifecycle

METHOD	ENDPOINT	AUTH	DESCRIPTION
GET	/centers	Public	List active PSK/POPSK centers
GET	/appointments/slots	Public	Search available slot capacity by center, date and category (Normal/Tatkal)
GET	/appointments/capacity	Official	View booked-vs-capacity utilization for a center/date (queue monitoring)
POST	/appointments/fresh/book	Applicant	Book an appointment for a Fresh passport application
POST	/appointments/renewal/book	Applicant	Book an appointment for a Renewal/Reissue application
PUT	/appointments/{id}/reschedule	Owner	Reschedule (max 2 times, ≥3 working days' notice; 2nd reschedule has a fee)
DELETE	/appointments/{id}	Owner	Cancel an appointment (fee is non-refundable per policy)
GET	/appointments/{id}	Owner or Official	Get appointment detail by id
GET	/appointments/mine	Applicant	List the current applicant's own appointments
POST	/appointments/{id}/complete	Official	Mark the PSK counter visit as completed
POST	/appointments/{id}/no-show	Official	Mark applicant as a no-show (fee forfeited)

4. police-verification-service — PV Cases (port 9084)

Owens: PV classification (Pre-PV/Post-PV/Exempt), case lifecycle, SLA deadlines — KB-PASS-003 rules

METHOD	ENDPOINT	AUTH	DESCRIPTION
GET	/pv/classification-rules	Public	Reference table of PV classification rules (Fresh/Renewal/Lost/Govt/Senior/Court)
POST	/pv/cases	Official	Dispatch a new PV case for an ARN (auto-classifies PV type and SLA deadline)
GET	/pv/cases/{arn}	Owner or Official	Get PV case status by ARN
GET	/pv/cases?status=	Official	List/queue PV cases filtered by status, paginated
PATCH	/pv/cases/{arn}/status	Official	Progress a PV case (Assigned → In Progress → Cleared / Adverse)
POST	/pv/sla-breaches/refresh	RPO Official / Admin	Scan and flag PV cases that have breached their SLA deadline

5. grievance-appeal-service — Grievances & Appeals (port 9085)

Owens: citizen grievances (KB-PASS-005 SLA matrix) and the 4-level appeal authority chain

METHOD	ENDPOINT	AUTH	DESCRIPTION
POST	/grievances	Applicant	File a grievance (status delay, PV delay, misconduct, etc.)
GET	/grievances/mine	Applicant	List the current applicant's own grievances
GET	/grievances?status=	Official	List/queue grievances filtered by status, paginated

METHOD	ENDPOINT	AUTH	DESCRIPTION
PATCH	/grievances/{id}/status	Official	Update grievance status (In Progress / Resolved / Escalated) with resolution notes
GET	/grievances/sla-matrix	Public	Reference table of grievance type → channel → SLA → escalation path
POST	/appeals	Applicant	File an appeal against a rejected application (starts at Level 1 / DPO)
GET	/appeals/{arn}	Owner or Official	Get the appeal history/chain for an ARN
GET	/appeals?status=	Official	List/queue appeals filtered by status, paginated
PATCH	/appeals/{id}/decision	Official	Decide an appeal, or escalate it to the next authority level automatically
GET	/appeals/authority-chain	Public	Reference table of the 4-level appeal authority chain (DPO → Joint Secretary)

6. fraud-service — Fraud & Escalations (port 9086)

Owens: fraud reports, CVC/ACB/CBI referral routing, special escalation cases — KB-PASS-007 rules

METHOD	ENDPOINT	AUTH	DESCRIPTION
POST	/fraud/reports	Applicant / Official	File a fraud report (auto-derives severity + referral authority by category)
GET	/fraud/reports/mine	Applicant / Official	List reports filed by the current user
GET	/fraud/reports?status=	Official	List/queue fraud reports filtered by status, paginated
PATCH	/fraud/reports/{id}/status	Official	Update a fraud report's status (Under Review / Referred / Closed)
GET	/fraud/referral-matrix	Public	Reference table: fraud category → severity → referral authority → outcome
POST	/fraud/escalations	Official	Create a special escalation case (disputed parentage, repeated lost passport, denied NOC)
GET	/fraud/escalations/{arn}	Official	Get escalation cases for an ARN
GET	/fraud/escalations?status=	Official	List/queue escalation cases filtered by status, paginated
PATCH	/fraud/escalations/{id}/status	Official	Update an escalation case's status

7. kb-ai-service — Knowledge Base & AI (port 9087)

Owens: KB document ingestion/chunking now; will host the Spring AI + RAG chat endpoints once Azure OpenAI credentials are supplied

METHOD	ENDPOINT	AUTH	DESCRIPTION
POST	/kb/ingest	Admin	Upload & chunk a KB document (multipart: title, docCode, version, audience, content, ...)
GET	/kb/documents	Admin / Official	List ingested KB documents, paginated
GET	/kb/documents/{documentId}	Admin / Official	Get KB document metadata by id

METHOD	ENDPOINT	AUTH	DESCRIPTION
GET	/kb/documents/{documentId}/chunks	Admin / Official	Get the text chunks generated for a document
PATCH	/kb/documents/{documentId}/supersede	Admin	Mark a document version as superseded
POST	/ai/passport/chat/sync	—	Synchronous RAG chat NOT IMPLEMENTED — returns 501 until Azure OpenAI credentials are supplied
POST	/ai/passport/chat/async	—	Streaming RAG chat NOT IMPLEMENTED — returns 501 until Azure OpenAI credentials are supplied

The two /ai/passport/chat endpoints exist per the SRS API contract but are intentionally stubbed (HTTP 501) — the RAG/LLM pipeline is the piece still pending your Azure OpenAI credentials.
